Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant agreed to amending the independent claims 1 and 8 with the following: --generator connected to separate un-insulated electrical conductors placed directly on a ground surface for the purpose of deterring animals; a step-up transformer, wherein output impedance of the step-up transformer is less than 100 ohms and optimally greater than 2 ohms.--. Applicant agreed to amending the specification page 11, second paragraph with the sentence --The ground surface in this application is intended to include low lying vegetation and displaced soil that may cover portions of the wire.-- The claims were amended to clarify that the uninsulated conductors are placed directly on the ground surface. Applicant agreed to amend page 11 of the specification to provide a definition of ground surface that includes low lying vegetation and displaced soil. These amendments are to be made through an examiner's amendment.
